

## Concrete Hoppers

Concrete Hoppers - This particular attachment is a self-dumping hopper that automatically triggers to dump whenever bumper release touches the side of a dumpster. As soon as unloading is done, the hopper returns to a locked and upright position. This piece of machinery is also presented along with a cable that allows operation from the seat of the lift truck in order to have the option of manually dumping the hopper. There is a locking chain provided in order to lock the hopper to the fork truck. This particular product is constructed with reliable and consistent robotic welds for maximum strength. The lift truck dumping hopper likewise has a blue powder coat finish to be able to maintain durability.
