

Aerial Work Platforms

Aerial Work Platforms - There are a variety of forklift attachments available on the market. They can help transform your lift truck so that you could expand your ability to pick things up or finish clean up tasks and material handling with greater ease.

Several attachments were specially designed for the forks themselves. For instance, fork extensions are utilized if you need a lot more blade length, that increases lifting capability. Fork extensions come in lengths varying from 48-120 inches. Triangular or rounded attachments are one more variety utilized if transporting rolled material in order to ensure it does not roll off of the typical flat forks.

Examples of lifting accessories comprise pivoting and telescoping boom or crane attachments. They can come in quite a few different kinds and are normally used for moving metal bars, lumber, poles and different kinds of bulky stuff. Other accessories like other styles of hooks and hook plates are presented in order to pick up objects utilizing a chain or sling. Magnetic lifters and slab lifters are other objects that could be utilized with hook accessories. Slab lifters are specialized attachments which are utilized for carrying a variety of materials which are delivered in a slab or sheet format. Carpet poles and rug rams are other lifting tools that attach to your lift truck so as to make transferring rolls of carpet easier. The attachment hooks onto the forklift's blades and has a pole which goes through the center of the carpet roll.

There are many types of forklift accessory utilized for facility maintenance like for example snow blades. These industrial forks could be attached to front end loaders and meant for transporting materials such as snow, dirt as well as mulch. Other popular cleanup accessories include magnetic sweepers and standard sweepers. Standard sweepers consist of a broom that the lift truck forks connect onto for sweeping big spaces such as parking lots or warehouse and factory floors. The magnetic sweeper is similar except that it has a magnetic plate rather than bristles. The magnetic sweeper is utilized in areas where there is lots of metal debris like on shop floors for instance. Sweepers have widths as much as 60 inches and this surface area makes clean up easy and fast.

A material spreader is another lift truck accessory that is often used at facilities. These spreaders are helpful for various applications like spreading seeds, ice melt, rock salt, pellets, fertilizers and insecticides.

Work platforms are another optional lifting attachment which many companies use day after day. The platforms range in size from 36" x 36" to up to 60" x 60". There are a few units available which are capable of folding up and storing into a smaller space. Work platforms are designed to raise personnel up to an overhead location making use of the lift truck. Larger platform models have extra space for employees to be able to bring tools and other necessary objects intended for the task. Usually work platforms are constructed of steel or ploy material.
