

Clark Forklift Parts

Clark Forklift Parts - Presently, there are no less than 350,000 Clark lift trucks performing globally, and in excess of 250,000 in use in North America alone. With five main lines across the globe, Clark is proud to be one of the most expansive corporations in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, gasoline, LPG, hand-driven lift trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift, covers more than 120,000 specialized items built for 20 unique designs of lift trucks and automated equipment. Your local Clark Seller is your total source for availability of all your parts requirements supplied by Clark Totalift.

Clark has a exceptional Parts Supply team. The items warehouses are conveniently stationed in Changwon, South Korea and Louisville, Kentucky to ensure exceptional service to both their customers and their sellers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing companies. Driven to supply the highest level of value and service to our customers, Clark remains on the leading edge when it comes to improving efficiency and benefiting performance.

Worldwide, Clark has one of the most outstanding supplier support networks. With over 550 locations worldwide, supplier representation in over 80 nations and 230 locations in North America, their high level of commitment to their customers predominates the materials handling industry.

Clark proudly remains an progressive leader of the industrial equipment industry, revolutionizing safety features such as the operator restraint system. This exceptional dedication to safety is now a standard feature on every lift truck.

Clark has a relentless mission to possess the No. 1 quality system in the industry which is demonstrated by their dedication to ISO standards. Clark, is the first manufacturer of forklifts and lift trucks to be internationally certified with quality standard ISO 9001 in all of its production plants. Furthermore, the ISO 14001 Environmental Conservancy System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement allows Clark to be prepared for any number of environmental restrictions, thus placing them in a dominant industry position.

Clark has chosen the structure of "Lean Manufacturing" at all of its assembly plants for the reason that this method is extremely economical and allows for minimal use of resources. Developed to ensure maximum proficiency, this system is designed to discover and acknowledge the most effective methods for production plant stewardship. Clark has completed this transition of its Korean plant. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and production efficiencies.

Clark's product engineers and suppliers communicate together to enhance the efficiency and excellence of their products while minimizing costs. The new value engineering agenda combines progressive product improvement and delivers superior client support and service within the industry.
