

Cascade Clamps

Cascade Clamps - Founded in Portland, Oregon in the year 1943, the Cascade Manufacturing Company began as a small machine shop employing only 4 people. Total sales for that initial year amounted to about sixty thousand dollars. The very first recorded sales revenues involved the machining and assembly of stainless steel pipe fittings, valves and different components. Through five years of operation, the company had stretched to forty employees and their annual sales volume had risen to \$330,000. These days, Cascade is amongst the leading global producers in the material handling business.

Production and design of the company's very first hydraulic cylinder paved the way in Cascade's aggressive pursuit of new business possibilities. Over the past 60 years, the material handling industry has developed into a highly sophisticated field and Cascade has proudly performed a part in this development. Cascade at the moment continues to grow as the premier supplier of lift truck attachments and different related products. The business feels confident in their skill so as to continue to lead the way in the business by understanding buyer's needs in the future and remaining competitive in the world market.

In the nineteen fifties, Cascade began designing, making and advertising hydraulic attachments. Construction was completed in the year 1956 on a new facility to house all the office and plant operations in Portland, Oregon at the company's present headquarters. Subsequent to fifteen years of business, total staff reached 180 staff and sales had reached nearly \$2,300,000.

1959 in Springfield, Ohio a second manufacturing facility was built. 1960 marked Cascade's initial move into the international world of the material handling industry while the company established interest in Australia, the Netherlands and England.

The business altered its name to Cascade Corporation in 1964. In the year 1965, Cascade went public with a preliminary offering of 200,000 shares of common stock. The company has expanded its manufacturing plants within the U.S. with places in Warner Robins, Georgia, Portland, Oregon and Springfield, Ohio. Cascade products are made globally due to numerous subsidiary operations. In 1994, a brand new plant was completed in Almere, the Netherlands which is Cascade's European command center. This facility is made to be the essential customer service centre.

Continuing to develop, Cascade expanded their product offering further in the year 1996 and 1997 with the remarkable acquisition of five firms, together with the worldwide leader in forks, the Kenhar Corporation.
