

JLG Forklift Parts

JLG Forklift Parts - After retiring in the late 1960's, John L. Grove started on a cross country RV trip. After spending many years establishing his family built crane company with his brother, John had no idea that this journey would bring about the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling technologies was the end result of a road trip.

All through their trip, John reacquainted himself with former business acquaintances along the way. In combination with these conversations and a noteworthy event; two workers were unfortunately electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John uncovered an infinite marketplace for a product that could swiftly and safely elevate individuals in the air to accomplish maintenance and other construction functions.

After returning from their vacation, John set up a partnership with two of his friends and purchased a metal fabrication business in McConnellsburg, Pennsylvania. Starting with a small crew of twenty staff, they produced and sold their first JLG aerial work platform in 1970. The company incorporates some of the basic design elements of that original lift into existing models.

JLG lift trucks have come a long way from the time when Mr. John L. Grove returned to town from his cross-country road trip and since the first aerial work platform debuted on the market. At present, the company proudly continues to expand itself into various markets globally and develops new products to make sure clients are capable of being more efficient and perform in the workplace within a safer atmosphere.
